Royal Wootton Bassett Downs View Cemetery

Report from Naomi Coleman, Rachel Deegan and Gillian Welsman-Clarke, Administrative Officers, to the meeting of Amenities Committee on Thursday 10th January 2019.

Purpose of the Report

The purpose of the report is to provide members with an update on the development of the new sections for baby burials and cremated remain burials within Downs View Cemetery.

Current Position

Following on from the recent meeting with the Cemetery Working Party, held on Friday 16th November 2018, officers have been investigating the creation of a new baby section and cremated remains section in the cemetery.

Minutes of the working party meeting, circulated to members on 29th November 2018, instructed officers to obtain quotes for the developing of these sites to present at the next Amenities meeting.

After meeting with Vanessa Martin from Aricab, we were informed that a Topographical Survey would need to be performed on the area before they could provide a quote on the cost of creating the new sections, together with a footpath which will provide access to the new sections. Aricab have contracted Brunel Surveys to carry out the Topographical Survey which is due to take place in January 2019 at the price of £650 + VAT.

Conclusion

Aricab will provide a quote for the works when the results of the topographical survey have been received. Officers will bring this quote to the next Amenities meeting on Thursday 1st March 2019.
